Assignment: Building and Hosting Your Personal Website

Objective:

This assignment is designed to give you practical experience in web development and hosting. You will create a personal website by modifying a provided template and then host it online using GitHub.

Part 1: Creating Your Personal Website   06

Step 1: Access the Project Template
- Download the project template from the following link:
  https://drive.google.com/drive/folders/1lw7BUZD0MU5p-edAsp6HNR-IeF3FigER?usp=sharing
-

   This folder contains all the necessary files to get started on your website.

Step 2: Customize the Website

- Locate the index.html file within the downloaded folder.
- Open this file in a text editor of your choice.
- Customize the contents of index.html to reflect your profile. This could include your name, a brief bio, projects, or any information you'd like to share.
- Save your changes.
- Open your modified index.html file in a web browser to preview your website. Make any additional adjustments as needed.

Part 2: Hosting Your Website on GitHub Pages   04

Step 1: Create a GitHub Account

- If you don't already have one, create a free GitHub account at GitHub.com. Use any email address you have access to for this.

Step 2: Host Your Website

- Follow a tutorial to learn how to host your website using GitHub Pages. A recommended tutorial is available on YouTube: https://www.youtube.com/watch?v=OltY8JIaP-4 This video will guide you through uploading your website files to GitHub and enabling GitHub Pages for hosting.

Submission Guidelines:

- Once your website is live, submit the **URL of your GitHub Pages website** and **HTML files via the assignment submission** portal.
- Ensure your website is accessible to the public and fully functional before the deadline.

Deadline: **April 04, 2024 Good luck, and have fun creating and sharing your website!**
